

# Warm and well this winter.

Your guide to:

- Looking after your health
- Saving energy and reducing heating costs
- Getting support if you're worried about your energy bills

# Protect your health

## Be ready for bad weather

Try to keep enough food and prescription medicine to last during periods of bad weather.

## Keep moving and stay social

Try to move every hour. Even gently stretching can keep you warm. Or visit a community group near you to stay cosy and connect with others. (See page 9 for details).

## Get your vaccinations

Colds and flu spread easily indoors. Get your jabs to protect yourself from seasonal illnesses.

## Avoid trips and falls

It's not only icy surfaces that make falls more likely.

- Keep walkways around your home clear.
- Wear shoes or slippers that fit well and have a good grip.
- Stay hydrated and eat well.

For more information visit:

[www.nhs.uk/conditions/falls](http://www.nhs.uk/conditions/falls)

## Keep your home warm

Keep the rooms you use at 18°C or warmer. Cold homes make you more likely to:

- Catch colds and flu.
- Fall due to cold muscles.
- Take longer to recover when you're unwell.

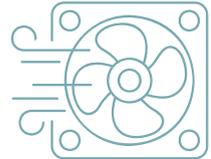

If you have a medical condition, or are older, it is even more important to keep warm.

# Tips to stay warm at home

- Close doors and windows properly.
- Block draughts with draught excluders or rolled-up towels.
- Shut curtains and blinds when it gets dark.
- Wear several layers of clothes. This keeps you warmer than one thick one.

# Reduce damp and mould:

- Put lids on saucepans when cooking.
- Dry clothes outside if you can, or ensure tumble dryers vent outside.
- Use extractor fans in kitchens and bathrooms. Open the bathroom window after a bath or shower and close the bathroom door.
- Let fresh air in sometimes. Leave a gap between furniture and walls to help air move around.

# Save energy, save money

Set your heating to turn off when you're out.  
Lower the boiler flow temperature a little.\*

Take showers instead of baths.

Improve insulation in your home.

Wash full loads of laundry at 30°C.  
Heated airers are cheaper to run than  
tumble dryers.

Turn off lights if they don't need to be on.  
Switch off appliances rather than leaving on  
standby. Boil only the water you need.

If your energy is cheaper at off-peak times,  
wait to use appliances then.

\*Do not lower hot water cylinder temperature below 60°C.

# Simple steps to stay safe:

## Use hot water bottles safely

- Check for cracks before filling and replace it every 2 years.
- Only use hot, not boiling, water.
- Only fill the bottle three-quarters full. Carefully squeeze out the air before closing the lid tightly.
- Use a cover or wrap it in a towel. Never put it straight on your skin or take it to bed.

## Prepare your home:

- Get a service for your boiler and gas appliances every year to check for any problems.
- Check smoke and carbon monoxide alarms are working.
- Check external pipework is in good condition.
- Have a torch or other light source ready in case of a power cut.

# Priority Services Register

The Priority Services Register is a UK wide service which provides extra advice and support, including when there's an interruption to your electricity, gas or water supply.

It is FREE to join for people who have extra communication, access or safety needs.

**Join online:**

[www.thepsr.co.uk](http://www.thepsr.co.uk)

**Need support?** Call your utility company and ask them to add you to the Priority Services Register.

## How to scan a QR code with a smartphone

Open the camera on your phone. Point the rear facing camera at the QR code. A pop-up or message should appear with the website link. Tap it to open the webpage. If nothing appears, you may need you to switch on QR scanning in the camera settings, or download a free QR-code scanning app. The digital services on the back of this booklet can show you how.

# Worried about the cost of putting your heating on?

## Citizens Advice

Get confidential support from your local Citizens Advice about:

- Energy bills and energy debt
- Housing, or speaking to your landlord about cold, damp, or heating issues
- Managing your money and debt
- Benefit checks to boost your income
- Grant applications
- Emergency heating support (if you're at risk of your energy being disconnected or your boiler/heater has stopped working).
